

Veterinary and Translational Organoid Research

Interdisciplinary Symposium & Workshop at the Vetsuisse Faculty
of the Universities Bern and Zurich
Organoids and engineered tissues as in vitro research platforms

20th May 2026

Location: Campus Zurich, Grosser Hörsaal TFA 00.44, Winterthurerstr. 260
Time: 09:00 – 17:00

Programme

- Opening keynote lecture by Prof. Karin Allenspach
- Short research presentations by members of the Vetsuisse Faculty and colleagues from other faculties at UZH and partner universities
- Afternoon breakout sessions and small group discussions
- Interactive workshop on future collaboration and funding strategies

About the Symposium

This interdisciplinary symposium brings together researchers and clinicians working with organoids and advanced cell culture models across veterinary species. The goal is to foster collaboration, harmonise methodologies, and develop a shared strategic roadmap for organoid research at the Vetsuisse Faculty and UZH.

Target Audience

Researchers and clinicians from the Vetsuisse Faculty, together with colleagues from other faculties at UZH and partner universities.
